**New York**

FACTORIES  
AVENEL, NEW JERSEY.

July 6, 1917.

American Numismatic Society,  
156th Street, Broadway,  
New York City.

Gentlemen:

Under date of June 5th we had the pleasure of favoring you with our Submission 17048 for a quantity of Roller Curtain Cases, but to date we have not heard from you relative to same.

In view of the increasing cost of materials we find it necessary to withdraw our quotation. Should you, however, still be interested in purchasing this equipment, we shall be very glad to refigure the proposition at your request.

Very truly yours  
STEEL EQUIPMENT CORPORATION

*W. D. Tucker*  
Manager

Steel Equipment Corporation,  
25 West 45th Street,  
New York.

Theodore Becker, Esq., Manager.

Dear Sir:-

I have your letter of the 6th withdrawing the quotation made on the roller curtain case. I am sorry that you have found this necessary as there was still a possibility that we might have come to an agreement with you on the former basis, something that now seems out of the question.

Yours very truly,

Secretary.

New York City

Attention of Mr. Higgins

Gentlemen:

Referring to your invoices for cabinet and shelving furnished us recently, may I say first that the book shelving seems now to have been put in first class condition. It is very regrettable that the workmen who first put up the shelving should have been so inefficient.

May I ask if it would not be possible to place across the top of the new cabinet a sheet of metal which would cover it and tend to prevent the infiltration of dust, and at the same time afford a support for anything which might be placed on top of the molding? A sheet the size of the cabinet with an allowance for the additional spread of the molding is all that would be necessary.

May I also ask you to go into the question of the difference between your initial estimate of \$3.50 for a running foot of the book shelving, or \$227. for sixty-five (65) feet of it which was our original estimate of what we required, and the second estimate of approximately the same figure for forty odd feet of shelving? It seems to me this difference is greater than it should be, and I should be glad to have an explanation of it.

Yours very truly,

Secretary.
